## How fast is a tesla model 3 in the quarter mile

GuelphRacing, a YouTube channel that covers Canadian drag racing events, stumbled upon some Tesla performance testing this week. It seems the channel focuses on loud gas cars with plenty of modifications, though it does note that it covers street cars as well. The recent event features a Tesla Model 3 Performance and a Tesla Model S Performance 'Raven.' Both cars belong to the same owner. The event took place on June 6, 2020 at the Toronto Motorsports Park. According to GuelphRacing, the two cars were putting down some impressive times. The channel notes this is especially true of "a couple of electric street cars." It seems Guelph has a lot to learn about Tesla vehicles. However, it's safe to say they're clearly not oblivious. In fact, they have plenty of good questions and can talk the talk no doubt. However, it also seems they were quite surprised that some electric cars could pull off such impressive times, not to mention stomping on some gas-powered competition. Guelph says the Model S Performance Raven (with the latest firmware update) was putting down 10-second quarter-mile passes. The Model 3 Performance was clocking times in the low 11s. Watch the video for more specific details. {"thumb": "c\_fill,q\_auto:good/c\_scale,w\_192/f\_auto/v1/archive/whichcar/2019/09/25/-1/Tesla-Model-3-Performance-acceleration-test.jpg", "resourceType": "image"}, {"alt": "Tesla Model 3 Performance Acceleration Test Launch Jpg", "sizes": "200vw", "srcset": "q\_auto:good/c\_scale,w\_768/f\_auto/v1/archive/whichcar/2019/09/25/Misc/Tesla-Model-3-Performance-acceleration-test-launch.jpg 768w, q\_auto:good/c\_scale,w\_1024/f\_auto/v1/archive/whichcar/2019/09/25/Misc/Tesla-Model-3-Performance-acceleration-test-launch.jpg 1024w, q\_auto:good/c\_scale,w\_2048/f\_auto/v1/archive/whichcar/2019/09/25/Misc/Tesla-Model-3-Performance-acceleration-test-launch.jpg 2048w, q\_auto:good/c\_scale,w\_3072/f\_auto/v1/archive/whichcar/2019/09/25/Misc/Tesla-Model-3-Performance-acceleration-test-launch.jpg 3072w", "src": "q\_auto:good/f\_auto/v1/archive/whichcar/2019/09/25/Misc/Tesla-Model-3-Performance-acceleration-test-launch.jpg", "downloadUrl": "q\_auto:good/v1/archive/whichcar/2019/09/25/Misc/Tesla-Model-3-Performance-acceleration-test-launch.jpg", "subHtml": "", "thumb": "c\_fill,q\_auto:good/c\_scale,w\_192/f\_auto/v1/archive/whichcar/2019/09/25/Misc/Tesla-Model-3-Performance-acceleration-test-launch.jpg", "resourceType": "image"}, {"alt": "Tesla Model 3 Performance Acceleration Test Figures Jpg", "sizes": "200vw", "srcset": "q\_auto:good/c\_scale,w\_768/f\_auto/v1/archive/whichcar/2019/09/25/Misc/Tesla-Model-3-Performance-acceleration-test-figures.jpg 768w, q\_auto:good/c\_scale,w\_1024/f\_auto/v1/archive/whichcar/2019/09/25/Misc/Tesla-Model-3-Performance-acceleration-test-figures.jpg 1024w, q\_auto:good/c\_scale,w\_2048/f\_auto/v1/archive/whichcar/2019/09/25/Misc/Tesla-Model-3-Performance-acceleration-test-figures.jpg 2048w, q\_auto:good/c\_scale,w\_3072/f\_auto/v1/archive/whichcar/2019/09/25/Misc/Tesla-Model-3-Performance-acceleration-test-figures.jpg 3072w", "src": "q\_auto:good/f\_auto/v1/archive/whichcar/2019/09/25/Misc/Tesla-Model-3-Performance-acceleration-test-figures.jpg", "downloadUrl": "q\_auto:good/v1/archive/whichcar/2019/09/25/Misc/Tesla-Model-3-Performance-acceleration-test-figures.jpg", "subHtml": ""}]] data-gallery-ad-options-value={"unitPath": "/13534306/whichcar/motor/features", "env": "Prod"} data-action=click->gallery#open gallery:open@document->gallery#open lgBeforeOpen->gallery#onBeforeOpen lgAfterOpen->gallery#onAfterOpen lgAfterSlide->gallery#beforeClose resize@window->gallery#resize> 25 Sep 2019 Gallery4 Tesla has made its name by taking full advantage of the instant and brutal acceleration of electric motors, its range of sedans and SUVs often offering supercar-slaying performance.As such, the most common question from punters when testing a Tesla is 'how fast is it?'. During our first Australian test of the new Model 3 Performance, we certainly weren't going to pass up an opportunity to run it down the Heathcote hotmix. 4 Until now, performance testing electric cars has been a nightmare. The last time we did so was with a Tesla Model S P100D in 2016, which provided the conundrum of needing as much charge as possible to give its best performance, tricky when Heathcote is a two-hour drive north of Melbourne.Thankfully, the Model 3 Performance avoids such issues. Not only does it benefit from a far superior charging network to that which existed three years ago, but selecting Track Mode turns on the fans to regulate the battery temperature and ensure the full 353kW/639Nm are available.There is no skill to performance testing a Model 3 Performance, or indeed any all-wheel drive electric car. Maximum torque from zero rpm means there's no benefit to spooling the car up (and the Model 3 Performance simply beeps at you if you try), just mash the throttle from rest and let it do its thing. MORE Model S P90D v RS7 Performance The off-the-line surge is immense, forcing you back into your seat. It matches the likes of the Audi RS3 and Mercedes-AMG A45 to 50km/h, but then surges ahead as these 'old-school' hot hatches select second gear. googletag#show googletag#hide->googletag#hide resize@window->googletag#refresh >Hitting 100km/h takes just 3.6sec (0.2sec slower than its claim but still very impressive) but from there the acceleration starts to slow. Completing the quarter mile takes only 12.02sec but the terminal speed is just 179.83km/h, a number more commonly associated with cars running low-13s rather than knocking on the door of 11s.A comparison with a couple of similarly speedy machines proves just how different the power delivery of electric motors is. We clocked the current Porsche 718 Cayman S at an identical 12.02sec over the quarter mile, but its trap speed was 189.12km/h. 4 An Audi TT RS is neck-and-neck with the Model 3 Performance at 100km/h (3.59sec) but stretches away from there, completing the quarter in 11.75sec at 191.89km/h.The biggest difference, however, is that these two examples use highly effective launch control systems to achieve these times. In the real world, by the time their drivetrains have engaged the Tesla will be long gone - it makes even the sharpest internal combustion engine feel lazy. Here is a very interesting series of drag races between three versions of the Tesla Model 3 - Standard Range Plus (RWD), Long Range (AWD) and Performance (AWD) - conducted by carwow in the UK. Obviously, we know which version is quicker, but the differences between them, especially at higher starting speeds, might be surprising. "So the drag may be a foregone conclusion, but how about the other challenges? After all, there's only £16,000 between the Standard and the Performance, so will the Long Range or Standard Plus be able to reel in the Performance?" From a standstill, the Performance version won with a noticeable advantage over the Long Range, but not as big as between the Long Range and Standard Range Plus. 1/4 mile results: Performance (AWD), 457 hp and 660 Nm: 11.7 seconds Long Range (AWD), 367 hp and 510 Nm:12.2 seconds Standard Range Plus (RWD), 296 hp and 450 Nm: 13.8 seconds When starting from around 30 mph (48 km/h) the Performance jumped ahead, but overall the difference between the Performance and Long Range was smaller. At around 50 mph (80 km/h), the difference further decreased (SRP was closer also) and at around 110 mph (177 km/h) the Long Range actually caught the Performance version and passed it! The final test, at around 70 mph (113 km/h), was bizarre because the Long Range Tesla turned out to be the quickest (slightly)! In other words, the Long Range could actually have similar or better acceleration in a speed range needed to overtake. Another surprise is the braking test because the Long Range (AWD) version needed a marginally shorter distance than the Performance version, which was supposed to have stronger brakes. Maybe other factors affected the results (tires, temperature) The Standard Range Plus, which is the lightest, noted the shortest stopping distance. See also
